ProHeat™ 35

Liquid-Cooled Induction System

ProHeat 35

Heating System

Liquid-Cooled Induction System

Quick Specs

Applications Process piping Refinery Petrochemical Power piping Pressure vessels

Structural

Maximum Preheat Temperature 1,450°F (788°C)

Input Power

460-575 V. 3-phase, 60 Hz 400-460 V, 3-phase, 50/60 Hz

Input Amperes at Rated Output

400 V: 60 amps 460 V: 50 amps 575 V: 40 amps

Rated Output

35 kW at 100% duty cycle

Power Source Dimensions

H: 27.5 in. (699 mm) W: 21.75 in. (552 mm) D: 36.75 in. (933 mm)

Power Source Weight

Net: 227 lb. (103 kg) Ship: 265 lb. (120 kg)

Powering a heating revolution – for preheat applications up to 1.450 degrees Fahrenheit (788°C).

The ProHeat 35 liquid-cooled induction heating system provides a highly versatile tool for preheating, stress relieving, hydrogen bake out, post weld heat treat and shrink fit in a variety of pipe diameters and flat plate.

Designed with flexibility in mind, the ProHeat liquid-cooled induction heating cables can be wrapped into coils of various shapes and sizes to fit almost any induction heating application. Great for applications with geometries and temperatures that prevent the use of air-cooled blankets.

ProHeat liquid-cooled induction heating cable shown.

Improved working environment is created during welding. Welders are not exposed to open flame, explosive gases and hot elements associated with fuel gas heating and resistance heating.

Easy setup is achieved using flexible heating cables combined with user-friendly insulation blankets.

On-board temperature control provides for manual or temperature based programming in a simple-to-learn operator interface.

Uniform heating is maintained along and through the heat zone by using induction heat within the material. The surface of the part is not marred by localized conducted heat at higher than specified temperatures.

Time-to-temperature is faster than conventional processes due to the method of applying heat, reducing cycle time.

ProHeat 35 power source shown with heavy-duty induction cooler (951686) and optional running gear (195436).

ProHeat™35 Liquid-Cooled System

ProHeat 35 Power Source 907689 460-575 V 907690 400-460 V, CE

The ProHeat 35 induction power source is equipped with a built-in temperature controller allowing for manual or temperature-based programming using up to four control thermocouples. At more than 90 percent efficiency, the ProHeat 35 power source transfers more energy to the part, reducing operating costs over different heating methods. One ProHeat 35 power source has two outputs and can run one or two heating cables at a time.

Note: Primary input cable and strain relief not included.

Post Weld Heat Treatment Blanket

Fifty thermal cycles or more per blanket reduces consumable costs compared to other heating methods. Blanket

efficiently insulates and optimizes coupling distance between the coil and the workpiece while protecting the liquid-cooled cable. Fully enclosed, sewn blanket eliminates dust for a better work environment. See ordering information on the back page for available sizes.

Digital Recorder 195374 6 channel 300698 12 channel

The digital recorder is commonly used in stress relieving and critical preheat applications. The recorder stores temperature data based on time. It is not required to perform successful heating applications.

Heavy-Duty Induction Cooler

951686 Cooler with coolant (US and Canada only) **301298** Cooler only (not available in US and Canada) Optimized for induction heating applications, cooler features a 2.5-gallon rustproof polyethylene tank, high-pressure pump and blower to yield a high cooling capacity.

Running Gear 195436

Running gear adds to the portability of the system. The four 5-inch swivel casters with brakes mount to the bottom of the power source or cooler.

Thermocouple **Extension Cable 194968** 50 ft. (15.2 m) 300998 75 ft. (30.5 m)

A simple means of providing thermocouple inputs from the heated part to the power source. The durable cable eliminates

the cluttered stringing of individual wires to the work. The terminal connection enables six thermocouples to be used with the system. **Temperature Measurement** 194999 Thermocouple wire.

500 ft. (152 m)

195098 Thermocouple connectors (10 pack)

194959 Thermocouple

attachment unit (not shown)

Thermocouples welded directly on the part being heated are the most accurate way of monitoring part temperature for recording and controlling the heating process.

ProHeat™ 35 Liquid-Cooled Induction System (Continued)

Liquid-Cooled Heating Cable

300045 30 ft. (9.1 m) **300046** 50 ft. (15.2 m) **300047** 80 ft. (24.4 m) **300049** 140 ft. (42.7 m) **300566** 160 ft. (48.8 m)

The heating cable couples the power to the part to be heated. The silicone hose encloses a special copper conductor specifically designed for carrying high-frequency current to maximize efficiency. The hose also carries the coolant which cools the conducting wire. The hose is reinforced for strength and durability.

Output Extension Cable

300180 10 ft. (3 m) **195402** 25 ft. (7.6 m) **195403** 50 ft. (15.2 m)

300598 75 ft. (22.9 m)

The output extension cable connects the liquidcooled heating cable to the power source. Two quick connect coolant jumpers are included with each cable.

Additional Accessories

Contact
Thermocouple
Sensor (Probe)
200202
Contact
thermocouple
sensor installed
between the

insulation and the part being heated. The contact thermocouple sensor can be used in preheat applications up to 500 degrees Fahrenheit (260°C).

Preheat Cable Cover

204611 30 ft. (9.1 m) **204614** 50 ft. (15.2 m) **204620** 80 ft. (24.4 m)

Used in preheat applications to protect the heating cable from slag and molten metal created during welding. The 1/2-inch thick preheat insulation must be used with the preheat cable covers.

Preheat Insulation

For preheat applications up to 600 degrees Fahrenheit (316°C). Designed to protect the liquid-cooled cable from high temperatures and maintain the optimum coupling distance between the coil and the work. The preheat insulation is 1/2-inch thick and can be cut to length to fit your application. See ordering information on the back page for available sizes.

Preheat Insulation with Cable Harness 301334

Liquid-cooled heating cable coils of various sizes can be attached directly to this preheat insulation. Once a coil is set up it can easily be moved from part to part reducing setup times. The insulation is 10-foot (3 m) long and can be cut to length to fit your application. Heating cable not included.

Remote Contactor Control 043932

Remotely start and stop the heating process with this wired rocker switch remote. Includes a 25-foot (7.6 m) cable.

RHC-14 Remote Hand Control 242211020 20 ft. (6 m) **242211100** 100 ft. (30.5 m)

Remotely adjust the heat output of the system in manual mode as well as start and stop the heating process.
